1. The first part of the report  
describes the general situation  
of the country in 1950. It  
states that the country was  
in a state of economic  
collapse. The government  
was unable to pay its  
debts and the country  
was in a state of  
anarchy. The population  
was suffering from  
starvation and disease.  
The report then goes on to  
describe the measures taken  
by the government to  
revive the economy. It  
states that the government  
has taken a number of  
steps to improve the  
country's financial  
position. It has  
reduced its expenditure  
and has increased its  
revenue. It has also  
taken steps to improve  
the country's  
infrastructure. The  
report concludes that  
the country is now in a  
state of economic  
recovery. It is  
able to pay its debts  
and is in a state of  
relative stability.
